

# How many meters is the uninterruptible power supply in Zimbabwe

---

Is Zimbabwe achieving universal electricity access?

Despite recent achievements,Zimbabwe's electricity sector still faces power supply deficits and slow progress toward universal electricity access. Peak electricity demand is projected to grow substantially,and achieving universal electricity access will require large investments,especially in solar power and grid expansion.

What is Zimbabwe's Electricity generation capacity?

As of 2023,Zimbabwe's installed electricity generation capacity was approximately 2,540 MW. However,due to a combination of factors such as climate change,ageing infrastructure and equipment breakdowns,actual electricity generation is often much lower than this capacity,resulting in power cuts and load shedding.

How is Zimbabwe addressing the electricity shortage?

To address the electricity shortage,the Zimbabwean government has been investing in renewable energy sources such as solar power and also looking into importing electricity from neighboring countries.

Who owns electricity in Zimbabwe?

Generation,transmission and distribution of electricity in Zimbabwe is the sole responsibility of the state owned Zimbabwe Electricity Supply Authority,(ZESA). ZESA owns four thermal power stations,of which the biggest is the coal-fired Hwange Power Station in the west of the country capable of producing 920 MW of power.

How much electricity does Zimbabwe import?

Zimbabwe imported 2,220,000 MWh of electricity in 2016,covering 31% of its annual consumption needs. This was part of Zimbabwe's electricity generation and consumption statistics,which also include exports,nuclear,renewable,and non-renewable energy sources.

What causes Zimbabwe's interconnected problems of electricity supply & access?

The ZEU finds that Zimbabwe's interconnected problems of electricity supply and access are ultimately driven by three underlying issues: weak financial performance of energy companies, insufficient central planning and coordination, and limited private sector participation.
