

# Legal principles and regulations for building EMS for communication base stations

---

Should fire departments incorporate EMS?

Just as incorporating EMS represented a major change in fire department responsibilities and impacted station requirements, so should other areas which some fire departments are currently considering. For example, fire prevention has long been a service of fire and emergency services organizations.

Do mobile phones need a base station?

Mobile phones and other mobile devices require a network of base stations in order to function. The base station antennas transmit and receive RF (radio frequency) signals, or radio waves, to and from mobile phones near the base station. Without these radio waves, mobile communications would not be possible.

Can a radio base station be installed within a building?

The proposed radio base station installation within building is certified to constitute material change in use which necessitates submission of notification to the Building Authority under BO s25.

Do I need planning permission to install a radio base station?

If a radio base station (and its antenna) is to serve the occupiers of the building in which it is installed, the installation is considered as uses ancillary to the primary use of the concerned building and no separate planning permission is required from the TPB. 2.

Should a fire and EMS Station serve as a model?

In each of these areas, the fire and EMS station should serve as the model for the community. As with any public or private facility, fire and emergency services stations are subject to theft, vandalism and violence. For staffed stations, these acts are most likely to occur when emergency response personnel are on a call.

What is a radio base station reconfiguration procedure?

This procedure outlines the application procedure to be followed by the mobile services operators (hereinafter called the ?operators?) for the reconfiguration of existing radio base stations NOT involving changes in the structural design and planning perspective of the parent building, and the change of land use.
